Professional Summary

Computer Science and Engineering graduate with 2+ years of hands-on experience in web development, frontend development, Shopify, and CMS-based solutions. Experienced in building responsive, user-focused websites and eCommerce storefronts using HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Shopify Liquid, and modern web technologies. Worked on 60+ Shopify storefronts and 30+ responsive business and landing pages for international clients. Strong foundation in databases, SQL, Python, software engineering, artificial intelligence, and machine learning through academic and practical projects. Comfortable learning new technologies and working with APIs, third-party integrations, CMS platforms, and development tools.

Technical Skills

- **Web Development:** HTML5, CSS3, JavaScript, TypeScript, Responsive Web Design, REST APIs, JSON, Browser Debugging
- **Frontend:** React.js, Next.js, Tailwind CSS, Material UI, Component-Based Development, Responsive UI, Cross-Browser Compatibility
- **Shopify & E-Commerce:** Shopify, Shopify Liquid, Theme Development, Theme Customization, Custom Sections, Templates, Metafields, Storefront Customization, Shopify APIs, Third-Party App Integration, Shopify Plus Fundamentals
- **CMS:** Shopify, WordPress, CMS Customization, Content Management, Theme Customization, Dynamic Content
- **Programming:** JavaScript, TypeScript, Python, Java, C, Node.js
- **Database:** MySQL, MongoDB, SQL, Database Design, Joins, Constraints, Triggers, Normalization, Data Management
- **AI & Machine Learning:** Python for Data Analysis, Machine Learning Fundamentals, Data Preprocessing, Classification, Clustering, Neural Networks, Basic Deep Learning Concepts
- **Tools & Development:** Git, GitHub, VS Code, npm, Postman, Figma, Vercel, Chrome DevTools

Professional Experience

Frontend Developer – Softvance (Bitopia Group)

Dec 2025 – Aug 2026

Dhaka, Bangladesh

- Developed and maintained 60+ Shopify storefronts for international clients, including custom themes, responsive layouts, Liquid sections, templates, and storefront functionality.
- Built responsive and reusable frontend components using HTML5, CSS3, JavaScript, React, and Tailwind CSS based on Figma designs and client requirements.
- Customized Shopify themes and integrated third-party applications and services to support eCommerce functionality and client-specific requirements.
- Worked on frontend debugging, cross-browser compatibility, responsive behavior, performance improvements, and user-experience enhancements.
- Collaborated with designers and clients to implement designs, resolve issues, and deliver functional web and eCommerce experiences.

Web Developer – Sardar IT

Aug 2025 – Nov 2025

Dhaka, Bangladesh

- Developed 30+ responsive landing pages and business websites from Figma designs using HTML, CSS, and JavaScript.
- Implemented responsive layouts, interactive components, navigation systems, forms, and reusable frontend elements.
- Performed functional, browser, device, and performance testing to identify and resolve frontend issues.
- Applied basic SEO, accessibility, performance, and cross-browser development practices to improve website quality.

Selected Projects

Personal Portfolio Website

[Live Demo](#) [Git Repo](#)

- Developed a responsive portfolio using **React and TypeScript** to showcase professional experience, Shopify projects, technical skills, and client work.

TimeCraft – Headless E-Commerce Application

[Live Demo](#)

- Developed a modern headless eCommerce application using React, Shopify, GraphQL, Tailwind CSS, and Vercel.
- Worked with Shopify data, APIs, product information, frontend components, responsive layouts, and deployment workflows.

Student Hostel Management System

[Live Demo](#)

- Developed a web-based management application for organizing student information, meal schedules, and administrative operations.
- Applied frontend development, application logic, database concepts, and structured data management.

University Management System

[GitHub Repository](#)

- Designed a relational database system for academic records using SQL, normalization, joins, constraints, and triggers.
- Applied database design and data-integrity concepts to organize and manage structured information.

Computer Science Knowledge

- **Programming:** Strong academic foundation in programming, object-oriented concepts, algorithms, data structures, and problem solving.
- **Database Systems:** SQL, MySQL, MongoDB, relational database design, normalization, joins, constraints, triggers, and data integrity.
- **Python:** Familiar with Python programming, data processing, data analysis, and implementing academic programming and machine-learning projects.
- **Artificial Intelligence & Machine Learning:** Academic knowledge of supervised and unsupervised learning, classification, clustering, neural networks, model evaluation, and data preprocessing.
- **Software Engineering:** Understanding of software development life cycle, debugging, version control, testing, documentation, and collaborative development.
- **Computer Systems:** Academic foundation in operating systems, computer networks, computer architecture, and cybersecurity fundamentals.

Professional Strengths

- Strong problem-solving and debugging skills with a practical approach to identifying and resolving technical issues.
- Comfortable working with existing codebases, learning unfamiliar technologies, and following technical documentation.
- Able to translate Figma designs and business requirements into responsive, functional web interfaces.
- Interested in continuous learning across web development, eCommerce, CMS, backend technologies, databases, AI, and machine learning.

Education

B.Sc. in Computer Science and Engineering
[Green University of Bangladesh](#)

2026
CGPA: 3.44/4.00
